Tiesto has released a preview for his upcoming track, "Take Me," to be released on his own label, Musical Freedom. This track, featuring vocalist Kyler Englund, is an example of the transformation Tiesto has made throughout his incredibly impressive career, reinventing himself from a trance superstar to an electro-house idol. The song contains the kind of uplifting big room progressions that have defined Tiesto's latest productions, while still staying true to the energy that made him famous in the first place. This track will be released May 14th (just in time for festival season), so expect to hear this track from Tiesto as he makes stops throughout the world at the biggest EDM festivals. Check out the preview above!
